About the project

{website owner} is a company located in {website's owner country} that specialized in central fragrant technologies. {website's owner name} wanted a website and branding solution to reach rich people in {website's owner country} and make them loyal customers.

The solution {creator name} provided was to rebuild the brand, especially the identity side, and build a premium website to give the visitors the message that the company wants to deliver.

The core power of this project was to create excellent packaging for {company name} perfumes and present them in a perfect way supported by providing scientific information about each fragrance and how it affects consumers.

One of the most challenging points in the project was creating an effortless mobile shopping experience. The targeted audience is not mobile shopping experienced; they usually go to malls and regular shops for shopping. To see {website name} website, visit {website URL}.
